

Gandhinagar University

A Report on

“GBRC Visit - 2023”

(27th September 2023, Thursday)

Abstract:

Gandhinagar University – Gandhinagar Institute of Science organized Industrial visit on 27th September, 2023. The tour was organized to make students aware regarding the various advanced instruments and technology implied in recent times for various biological analysis.

Program overview:

Industrial visit organized by Gandhinagar Institute of Science for all undergraduate and postgraduate student of Chemistry and Microbiology Department. Twenty-four students with three faculties visited Gujarat Biotechnology Research Center (GBRC) on mentioned date and day. They were introduced to the shared lab facilities, advanced research facilities and project activities of GBRC. It was very informative and students were satisfied with the information shared by the team GBRC. They focus upon development of technology through research and development in the areas of agriculture, healthcare, environment, animal, marine and bioinformatics. They conduct cutting edge research & innovation leading to Product/ Process/ Prototype development with application in healthcare, agriculture, environment, marine. Students were happy to know that they provide state of art Shared Laboratory facilities for researchers and academicians. GBRC also undertake contract/sponsored research with industries and institutions.

The way Participants Benefited:

- Participants knew about the activities related to Bio-banking, Bioinformatics and Genomics.
- Participants received information regarding the importance of Development of National & International collaborations.
- Information received regarding various activities of Development of National & International collaborations.
